Education

•National Institute of Technology, Kurukshetra *2022-Present*
BTech: Information Technology CGPA: 8.24/10

•BRSK International Public School *2021*
Percentage - 93 12th Board | CBSE

•Convent Public School
Percentage - 87.4 10th Standard | CBSE

Experience

•Software Developer (Freelance)
Rajasthan Technical University, Kota | ***View Project*** Dec 2024 – Jun 2025

- Built a scalable MERN platform serving 100+ active users, implementing controller-service architecture for modular backend design
- Designed backend using DTO pattern to ensure structured and efficient data transfer between layers
- Designed and deployed role-based task workflow system, handling assignments, and evaluation across 3+ user roles
- Implemented real-time notifications and leaderboard using WebSockets, improving user engagement by 35%
- Integrated face recognition-based attendance system, reducing manual verification effort by 80%
- Developed admin dashboard for analytics, tracking user activity, task completion rates, and engagement metrics
- Automated background jobs (email notifications, scheduling), reducing manual intervention by 60%
- Optimized backend APIs and database queries, improving response time by 30–40%

Projects

•Code Collaborator | View Project *MERN, WebSockets, Monaco Editor*

- Built a real-time collaborative coding platform supporting multiple users per room (5–10 users)
- Implemented JWT-based authentication for secure sessions
- Designed room-based architecture for dynamic session handling
- Optimized real-time synchronization reducing latency by 40%
- Added code export and theme customization features

•Real-Time Peer-to-Peer Video Calling Platform *WebRTC, WebSockets, Node.js, React*

- Built a peer-to-peer video calling application using WebRTC enabling direct browser-to-browser communication
- Designed custom signaling server using Socket.io for offer/answer exchange and connection setup
- Implemented real-time audio/video streaming with low latency (sub-second delay)

Technical Skills

Languages: C/C++, JavaScript, SQL
Frontend: React.js, CSS, Ant Design, HTML
Backend: Node.js, Express.js, WebSockets
Real-time: WebRTC, Socket.io
Databases: MongoDB
Core: DSA (1200+ problems), OS, OOPS, DBMS
Backend Architecture: Controller-Service Pattern, REST APIs, DTO Design, Scalable Systems

Achievements

•Coding Profile : 235+ active days; 1000+ GitHub contributions

- **Smart India Hackathon :** College Winner, National Nominee *2024*
- **Excalibur :** Top 7 / 60 teams *2023*
- **Flipkart Grid 7.0 :** Semi-finalist *2025*
- **Thought Lab Club :** Student Secretary *2025*
